

Advanced Audiovisual and Collaboration Solutions

From immersive audiovisual and digital signage solutions, to creating collaborative work environments that improve business, to mission critical command and control AV systems, Advanced has the experience to deliver the right solutions to meet your needs.

What we do

Videowalls

We specialize in the sales of videowall technologies and supporting AV infrastructure across the USA and Canada. We offer a full-suite of professional services to support you from demonstration 'assessment centers', to engineering/design, project management, installation, and after-sales care.

Digital Signage

Leading the field of digital signage in North America with technology solutions such as OLED displays.

Audiovisual Systems

Advanced is North America's full service audio video solution provider that can engineer and install the right AV for your needs, anywhere.

SMART Board Solutions

Advanced provides collaborative and interactive SMART Board solutions for Education and Government.

Video Conferencing & Telepresence

Full range of conferencing solutions, including web conferencing, audio conferencing, webcasting, video conferencing and telepresence.

Command & Control

Advanced has the skills to design, engineer and install custom control room solutions such as video displays and collaboration software for mission critical environments.

Mass Notification

Communication is critical during an emergency and essential to disaster recovery plans. Advanced offers products and solutions for mass notification applications.
