

Laser Phosphor Display Technology Platform

Large format displays typically have been hindered by high-power consumption and limited applicability. Laser Phosphor Display (LPD) technology changes this with its flexible technology platform, characterized by brilliant luminance, scalability, and ultra-low power consumption. When combined with Prysm Systems visual collaboration software, the LPD platform can be leveraged for a multitude of use cases, spanning from digital signage, to interactive presentations, and to multi-site team collaboration.

The LPD display platform is ideal for users who want a bezel-free large display (greater than 100") that extends beyond the current size limitations of OLED and LCD formats, and delivers a comfortable ambient light experience, both for up-close touch interactivity and distance viewing, that current LED and projector technology cannot provide.

“Without exception, everyone who sees the wall is amazed — the impact is immediate and dramatic”

— Kevin McDermond,
Program Director, Brand
Creative, Under Armour

LPD 6K Series

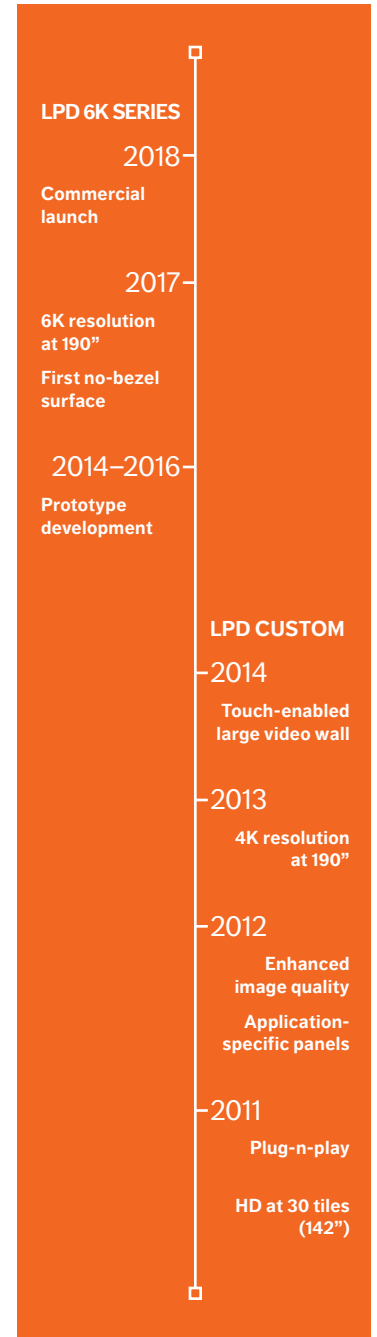

The LPD 6K Series is Prysm Systems groundbreaking large-format display. It is the world's largest single panel display and is available in pre-configured sizes. Offering 6K resolution, the series is fully interactive and supports virtually any commercial use case.

Benefits of the LPD technology platform

<p>Up to 6K Resolution</p> <p>Aided by a high-contrast ratio from light to dark colors, the LPD platform immerses the audience in high-quality content for the best experience</p>	<p>Low Power Consumption</p> <p>Being big doesn't mean big power bills. The LPD platform can save a company thousands of dollars in utility bills, compared to similar sized screens on different technology platforms</p>
<p>No Bezels</p> <p>Allow content to fully express its brilliant self AND avoid those pesky LED and LCD tile failures</p>	<p>High Pixel Fill-Factor</p> <p>Ensures viewers don't lose clarity of image or content up close or during distance viewing</p>
<p>Interactive</p> <p>Surface supports full interactive display, capable of supporting up to 32 unique touchpoints simultaneously with Prysm Systems software</p>	<p>Use Case Flexibility</p> <p>Let your video wall be your brand ambassador when needed, but also the workhorse to help teams make decisions faster during meetings</p>

About Prysm Systems

Prysm Systems Inc., is committed to developing and promoting large format display solutions using its proprietary Laser Phosphor Display (LPD) Technology. We have been delivering these highly immersive & engaging customer experiences to some of the world's leading organizations for over 10 years. Our solutions combine industry-leading display technology and software that work together seamlessly to up-level the traditional uninspiring presentation experience in the room. With a shared visualization canvas that allows interactivity, the in-room experience effortlessly extends to engage remote participants as well. As businesses continue to adapt and envision the best practices for moving the workplace forward, a complete solution that addresses both in-person and remote engagements is essential for their ever-changing business needs. Prysm Systems Inc. continues to lead the industry in these hybrid engagement solutions. Prysm Systems invented LPD technology in 2005 and it has been commercially available and globally deployed since 2010. Prysm Systems Inc. has a worldwide presence with our global headquarters in Silicon Valley. Learn more at prysmsystems.com.
