

Prysm-Powered Meeting Rooms

Transform your meeting rooms into advanced collaboration spaces, with Prysm

Prysm software and hardware solutions offer a quick, easy, and elegant way to upgrade your physical meeting spaces with advanced features — transforming your traditional meeting room into a creative and immersive collaboration suite. These Prysm-powered rooms enable users one-tap access to digital whiteboards and screen sharing, as well as cloud-based workspaces where they can bring multiple tools, applications, and content side-by-side onto a single digital canvas. And because you can leverage existing unified communications solutions, like Cisco, Polycom and Skype for Business, implementation is simple.

Getting started can be as easy as connecting a Prysm appliance to an existing display, transforming a standard space into a full digital collaboration suite. Prysm also transcends this traditional 'in room' experience, by allowing remote team members and customers to actively collaborate as part of the meeting, simultaneously, with the use of a Prysm license. Because Prysm software is in the cloud, content remains available, even after the meeting has ended.

Unlike other solutions, you can deploy Prysm in your existing IT environment. Use it to add intelligence to your existing meeting-room displays or pair it with a stunning Prysm 85" 4K display and stand for a turn-key solution. With Prysm-powered rooms, you can instantly transform your meeting spaces ... without a costly 'rip and replace' of your existing hardware or overhauling your IT infrastructure.

The Prysm Difference:

- Scalable to any screen size
- All-in-one solution option
- Works with any display
- Integrates with live sources
- Works alongside existing video conferencing solutions

Features

Prism-powered rooms allow users to:

- **Unify disconnected tools, apps, and content:** Never toggle between apps again. With Prism, you can share content, tools, and applications side-by-side on a single digital canvas so you can quickly see the big picture.
- **Actively collaborate with remote team members:** Get past the hurdles with video conferencing and screen sharing. Prism lets all meeting participants view and interact with the same content simultaneously.
- **Streamline the way work flows:** Don't stop collaborating when the meeting ends. Access Prism projects from any device or Prism-powered display — before, during or after a meeting — to continue working where you (or anyone) left off.

Prism-powered rooms are available in two configurations:

All-in-one solution:

Transform your workplace with a Prism 85" display, powered by a Prism Appliance and software license. This is a simple way to provide an instant upgrade to an outdated meeting space.

The all-in-one solution provides one-tap access to a digital whiteboard and wired or wireless screen sharing, as well as calling capabilities for specified vendors without logging in.

Individual user licenses are recommended for full access to the cloud-based visual collaboration software and web and desktop apps.

Add-on to your existing hardware:

If your company already has displays, you can add a Prism X15 or X30 application appliance to an existing display to deliver a more interactive and hands-on meeting experience.

This option also provides one-tap access to a digital whiteboard and wired or wireless screen sharing, as well as calling capabilities for specified vendors without logging in.

Individual user licenses are recommended for full access to the cloud-based visual collaboration software and web and desktop apps.

With Prism, your meeting-room IQ just hit "genius."

About Prism

Prism is a leading provider of large-format Laser Phosphor Displays (LPD), known as the LPD 6K Series, and Prism Application Suite, a cloud-based, visual collaboration solution. Prism solutions enable individuals and teams to see and interact with all their data, content, and applications on displays of all sizes. By providing these always-on digital canvases, Prism engages audiences, ignites innovative thinking, drives decisions, and transforms content into experiences. Customers using the LPD 6K Series benefit from interactive large-format single panel displays that offer a panoramic image uninterrupted by seams or bezels. Customers using the Prism Application Suite software benefit from an open, enterprise-grade collaboration solution that integrates with existing tools and scales to hundreds or thousands of users. Prism was founded in 2005 in the Silicon Valley and has offices worldwide. Learn more at prism.com.
